ASIA'S BOUTIQUE LANDSCAPE ARCHITECTURE CONSULTANCY FIRM

Based in Malaysia, Walrus Design is a multi-award winning boutique landscape architecture consultancy. Established in 2000 under the helm of Julien Hodson-Walker, Walrus Design is known for its personality, hands-on approach, innovative design, and sound technical knowledge. Walrus Design was founded and is maintained as a boutique firm with a compact and focused team. We have extensive experience in small to large-scale projects in Southeast Asia and the Middle East. We specialize in high-end residential projects, hotels, clubs, resorts, park design, landscape planning, and civic landscapes.

“We believe first and foremost that design is the power behind everything that we do. We encourage an inclusive collaborative relationship with our clients and co-consultants. Our focus is on developing innovative and creative yet pragmatic solutions to enhance a project’s aspirations and allow the landscape to add environmental and commercial value.”

Julien Thomas Hodson-Walker
Founding Director

MISSION

To continuously deliver innovative and outstanding designs that become manifest in enduring landscapes that benefit and enhance our natural and built environment.

VALUES

Sincerity

We believe in what we do

Positivity

We believe in solving problems

Integrity

We believe in honesty and doing the right thing

Creativity

We believe in innovation and benchmarking

Engagement

We believe in inclusiveness and cooperation

The Team

*Our success is found in our people,
their different yet complementary skills, expertise and personalities.*

The founder and principal of Walrus Design. He graduated with distinction and is a Chartered Member of the Landscape Institute (CMLI). While working in the UK he gained valuable experience with some of the country`s leading practices including Lovejoys and Building Design Partnership. Julien arrived in Asia in 1993 and by 1999 was the Director responsible for the Malaysian operation of a leading regional practice. In 2000 he decided to establish independent offices in Malaysia and later Singapore, but now choses to base himself in Malaysia as Walrus Design with which he has become synonymous.

Julien is a dedicated and passionate landscape architect who loves what he does. He has an inquisitive mind and will always challenge and test the design boundaries. Julien has high expectations of himself and his staff. He leads by example and promotes a conducive, creative and focused working environment that allows Walrus Design to continue operating at the highest level. Testament to this is the significant collection of international industry awards Walrus Designs projects have won.

Julien Thomas Hodson-Walker
Founding Director

The Team

WALRUS

Raduan is a Malaysian landscape architect with over 20 years of experience through a broad range of projects. He is a corporate member of the Institute of Landscape Architects Malaysia (ILAM) and holds a Master’s Degree in Sustainable Landscape Management, a Bachelor’s Degree in Landscape Architecture and a Diploma in Agriculture.

Raduan brings solid design skills, pragmatism and organizational skills at a strategic level to ensure projects are delivered following the client’s brief, meet our internal quality expectations and run smoothly. He is responsible for checking and signing off statutory Authority landscape related submissions and advising and coordinating staff on Authority Submission matters.

LAr. Mohd Raduan Mohd Daud
Director

WALRUS

Maisarah is a corporate member of ILAM who sits on the ILAM council. She has over 20 years of experience, 13 of which have been at Walrus Design. In addition to her experience with high rise and mixed use developments, she has extensive experience in running large contracts with multi-disciplinary teams and she is an integral part of our management team.

LAr. Siti Maisarah Salahudin
Associate

Evasukmaliza is a corporate member of the Institute of Landscape Architecture Malaysia (ILAM) with over 17 years of industry experience. Known for her bold creativity and visionary approach, she blends innovation with practicality to deliver landscapes that are both functional and inspiring. As a seasoned lead consultant, she excels in managing large-scale civic projects and thrives in multidisciplinary team environments. Her work reflects a deep commitment to design excellence and a passion for shaping meaningful outdoor spaces.

LAr. Evasukmaliza
Senior Landscape Architect

Julia Mishan is a Landscape Architect with over 10 years of experience in designing distinguished hotels, resorts, private residential, and mixed-use developments, as well as contributing to large-scale master plans. Over time, her professional focus has evolved toward urban design, driven by a deep interest in contemporary urban challenges. She pursued a Master's degree in Tropical Urban Design to further strengthen her expertise and continues to be dedicated to creating impactful, climate-resilient urban spaces. Julia is committed to redefining the role of landscape architecture in shaping cities, ensuring every project enhances public spaces and delivers meaningful experiences for communities.

Julia Mishan
Senior Landscape Architect

Ghafar Yaakob is a Landscape Architect with over 10 years of experience. He has been actively involved in the strategic planning and execution of projects ranging from small-scale developments to large, complex masterplans. His involvement spans the full project lifecycle—through initial design development, budgeting, and tendering, to authority liaison and construction management. Ghafar's project oversight experience, technical proficiency, and commitment to quality allow him to manage and deliver successful and impactful landscapes. His ability and experience work towards ensuring that every project is executed with professionalism, and a clear understanding of our high design and delivery expectations.

Ghafar Yaakob

Detail Design and Engineering aspects

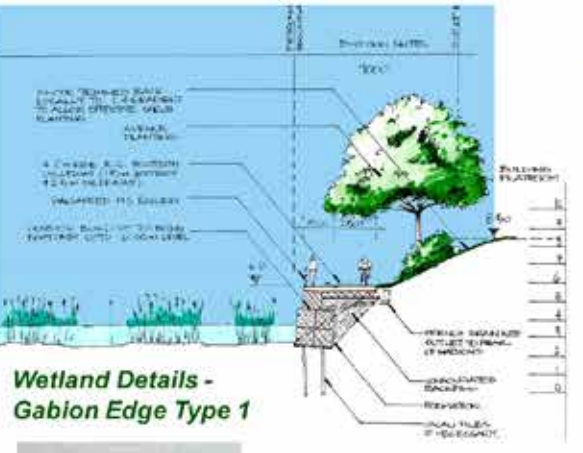

THE DESIGN APPROACH.
The approach to the landscape design is to create the most natural environment possible. The grading and ground modeling has been carefully designed with smooth, flowing, rolling gentle banks typical of lowland river valleys. The planting selection uses indigenous species laid out in naturally styled groupings.

The only hard edged or engineered elements are three low concrete weirs that control the water levels of the various ponds. In time these will become immersed in the planting and will accumulate mosses and ferns.

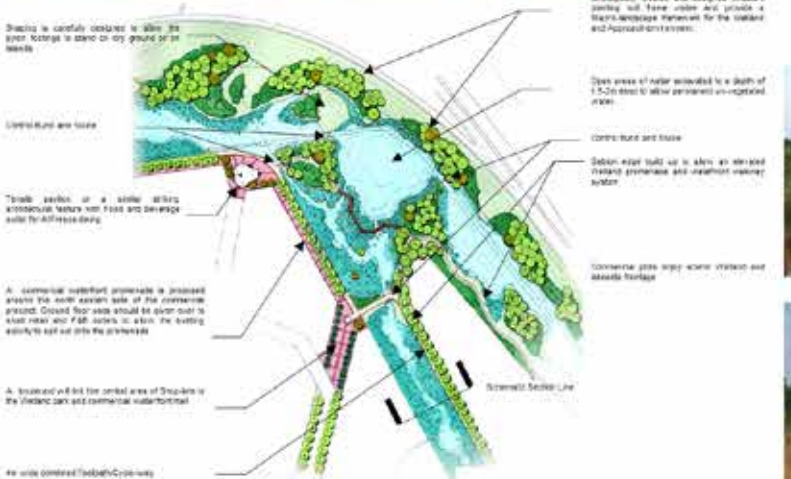

Where increased flow rates may occur we have avoided conventional engineering solutions and used loose rock gabions for bank protection. This is an environmentally sensitive solution because plants (and wildlife) will establish in and on the gabions eventually being completely covered in plants, blending them into the landscape.

Once the vegetation has matured, people will not know that this is a man-made, engineered drainage system. The presence of the TNB Pylons and the nearby highway reserve environments are man made but become less and less obvious as time passes. People will eventually believe that this wetland has always been there.

COST EFFECTIVENESS
Before the Wetland concept was launched, the drainage scheme had been designed by engineers as a series of concrete lined channels and connections to the road drainage. This treatment would have cost in the region of MR 10,000,000, without any landscape. The current scheme, with virtually no concrete, and with an almost natural ecosystem developing, cost in the region of MR 9,000,000 all inclusive, with the footpath and public access facilities, planting and drainage works, saving well over MR1,000,000 and providing a permanent public park in an area that would have been sterilized and closed to public access.
